Sensibly Contemporary...

Our Catalog, Our Mind Set

For over 20 years, Besa Lighting has been creating decorative lighting that features glass in astounding variety. Our designs harmonize functional light with design flair. This sophisticated collection ranges from contemporary exterior lighting to vibrant pendant lighting, to functional yet stylish ceiling and wall luminaires. Our designs appeal to both residential and commercial customers.

Our product line encompasses a variety of lighting categories, with a wide variety of styles and options. With so many choices, we have chosen to portray representative images of each series of product. Complete ordering information is listed on each page.

To make locating an item easy, we've created a visual product finder (pgs. 2-7). But if you have a item number already, we have a numeric index and a décor cross-reference chart to assist in finding complimentary luminaire finishes/décors. These may be found at the end of the catalog (pgs. 266-273).

A critical aspect affecting the safe use of Besa luminaires is selecting ones that are proper for the type (location) of the intended use. Besa manufactures luminaires listed for DRY, DAMP and WET locations. The appropriate location type is indicated for each luminaire series or family within our catalog. For more information on location definitions, see pg. 262.

Purchasing and Support

Besa Lighting is committed to achieving the highest level of quality and service. We welcome the opportunity to earn your trust through consistent attention to your needs, and to be a company upon which you can rely for lighting solutions.

Lighting Professionals

Besa sales representatives are available throughout North America to provide information and assist in any purchase or specification needs. To contact the Besa rep in your area, visit besalighting.com or call our customer service at 800-446-2372.

Consumers

Besa Lighting products are sold exclusively via authorized lighting distributors such as lighting showrooms and on-line retailers. Visit besalighting.com to locate a Besa Lighting distributor in your area. Contact our toll free consumer support line 866-917-8760 for questions or assistance about specific products.

Online Tools

Our website, besalighting.com, is the best way to obtain the most up-to-date information about Besa products. We're adding energy-efficient lamping options to all the products on our website interactively, so you can find the exact part number for the solution that best fits your situation. Our online tools also include complete product specification sheets, a knowledge database, a locator for authorized retailers and e-tailers, as well as a complete listing of Besa commercial sales representatives.

Glass- Beautiful & Viable

Traditionally, glass has been a primary material for creating fine luminaires. It offers beauty while effectively directing or diffusing the light output. This ancient art is also based on using natural materials. Even it's very nature makes it recyclable.

Each glass is handcrafted using traditional methods, passed down through generations. Personal experience and the artistry of each individual glassmaker is infused into every piece. Natural variations happen. Small differences in thickness, color or pattern and dimensions are normal. You may find a few air bubbles. Many glasses will appear noticeably different when illuminated than when not.

This art is the essence of handcrafted lighting glass. It lends character and distinction to Besa Lighting luminaires, and allows us to create a diverse collection. We believe this art adds real value to your contemporary lighting.

Illuminating Your Life

Light is for seeing. Illumination enriches your life.
 With beauty. With wisdom. With people.

For years, Besa has offered lamping options that can reduce your energy needs. Without fanfare, we've been expanding our sensible alternative offerings. It's not just being responsible, it's being an active part of our community.

With this catalog, we go further...with new solid-state (LED) and compact fluorescent (CFL) lightsources. These lighting options are energy efficient and thus better for our environment. Look for these icons to identify LED- and CFL-compatible luminaires.

Goodness happens when you sweat the details. When we ship our luminaires to customers, people often wonder why we use newspaper as packing material to protect their lighting.

- It not only protects your handcrafted glass, it reduces the waste stream by re-using a material that can be recycled yet again.
- It helps the community: Our recycled newspaper comes from a non-profit organization that employs developmentally-disabled adults.

Throughout our catalog, you'll find many luminaires described as **ADA-COMPLIANT**. This indicates that these luminaires comply with the dimensional requirements contained within the Americans with Disabilities Act. See Pg. 262 for more details.

Even the catalog you're holding in your hands is better for the environment. For complete information on our recycled paper, see the back cover.

Besa won't try to convince you that we're "green" and socially-responsible... because we're living it every day.
