We didn’t invent low voltage lighting, we reinvented it...
Landscape Lighting Design and Consultation

Vision, concept, and years of experience play a key role in the presentation of lighting. Unique Lighting Systems offers a service called Specification Design Support Program (SDSP). This system can assist you with your lighting design from concept to installation.

Unique wants all of their customers to be satisfied with their products. To ensure this satisfaction, Unique has developed the Consumer Buyer Protection Plan which guarantees both high quality installation and a high quality product. All Unique products are built from the highest quality materials and are designed to last as long as your home. Unique has placed a lifetime warranty on both Odyssey and Signature Series lines, solidifying their belief that their products are truly superior.

A professionally landscaped property is a sure ticket to quick resale. It gives a home curb appeal, a sense of place and value. It's the first thing you see. That first impression can add 20 percent to your home's value, a figure that tides the return on a new kitchen or bath.

Safety and Security

Landscape lighting is one of the most practical and effective ways to prevent crime in and around your home or office. In fact, statistics show that a well-lit property cannot prevent all crime, but crimes are less likely to occur because lighting is an evident deterrent. A landscape lighting system is a deterrent because it exposes the criminal, making them feel vulnerable and insecure. Criminals most likely look for areas with little to no lighting for obvious reasons. Homeowners on the other hand, can benefit from a landscape lighting system that can brighten an otherwise overlooked and dark surrounding.

A Quality Investment

More and more homeowners are realizing the importance of quality. This is why at Unique Lighting Systems, all of our products are made to stand the test of time. We view our products as a lifetime investment.

Part numbers contain vital information regarding model, material, wire length, lamp size, finish and other available options. Above is a diagram of where this information is placed in the part number sequence when ordering.
Why Unique?

S.M.A.R.T.E.R

As one of the low voltage lighting industry leaders for over 15 years, Unique Lighting Systems, Inc. continually strives to identify and incorporate the necessary principles of manufacturing to effectively develop innovative and durable products. Our theory of innovation is:

SEPARATION: The motivating force behind innovation is to develop products that are distinctly different from the standard.

MATERIAL: The use of materials that are most likely to withstand any environment or climate. All of our products are manufactured from the highest quality materials: Brass and Copper.

AWARENESS: Ease of product usability will help any user clearly identify the basic principles of design, installation, and maintenance.

RUGGEDNESS: In addition to material selection, the quality of the individual components of our products will help ensure the longest life of the system.

TESTING: Before our products are tested using the ETL and TUV testing laboratories, they are put through our rigorous Total Quality Assurance Program. This program includes up to 62 separate testing procedures ranging from research and development to field performance testing.

ENERGY: Energy & resource conservation is our priority in the development of our INTELLI-SYSTEM and Green Lite products.

RELIABILITY: With our Warranties, Consumer Buyer Protection Plan, System Integration AND numerous contractor and designer support services, Unique Lighting Systems, Inc. is your best solution to low voltage lighting.

S.M.A.R.T.E.R: The theory behind innovation

The Products

Unique Lighting Systems' highest commitment is to set the standard for manufacturing innovative and quality products. This commitment is evident throughout our detailed inspection processes and extensive field testing. From the initial design process of each product to the end assembly of each custom made individual part, our manufacturing process accomplishes the highest level of performance and durability carried through to final delivery to the end users. Durable construction and beautiful styling make Unique fixtures the ideal solution for any residential and/or commercial application. Unique Lighting already holds numerous product patents and we are constantly developing innovative ideas to help expand the lighting industry.

The System

Exclusive to Unique Lighting, the Power Management System was inspired by years of experience and expertise in the landscape lighting industry. Using the Power Management System will enable the installer to overcome voltage drop prevent fuse corrosion and increase ease of fixture adjustability and placement.

Support and Protection

Unique Lighting is dedicated to quality control by providing extensive training support and comprehensive protection programs. Our Consumer Buyer Protection Plan guarantees the system and confirms our commitment to Contractors, Designers and Homeowners. Through these various support programs you can be assured that every Unique Lighting system will remain safe, beautiful and functional.
Unique Consumer Buyer Protection

What Is It?
The Consumer Buyer Protection Plan is a simple yet thoroughly drafted plan for the installer to go through a few proven steps to ensure his or her business. Along with a 100% perfectly installed system, if the installer uses only Unique Lighting Products for the complete lighting system (transformer, fixtures, wire, connectors and hubs) we are now able to ensure the system against corrosion, stacking, oxidation and pothole issues.

How It Works
Since we are unable to warranty workmanship the Consumer Buyer Protection Plan acts as a check system to ensure your contractor is installing your system correctly. The key is the Verification Forms: the installer must perform 3 different functions to ensure us and our client:
- No Overloads
- No Shorts
- No blown fuses

THE PERFECT INSTALLATION

It’s as Easy as 1-2-3:
1st - Fill out the Verification Form
2nd - Complete the Lamp Replacement Chart
3rd - Complete the As-Built

When the installer has completed this thorough inspection process, the system’s integrity can be ensured. Please contact a representative at 408-955-3451 for more Consumer Buyer Protection Plan benefits!

Product Focus
New Products

Unique Lighting Systems commitment to manufacturing quality and innovative products is evident in that we hand build and test every fixture and transformer we sell. This commitment begins with the design process and is accomplished through manufacturing of each proprietary, custom made part that goes into each and every one of our fixtures and transformers and is carried through to final delivery of our products to the end-user.

Our new series of architectural bollards combines contemporary style with durable, vandal-resistant construction. Provides smooth, even pole illumination for a variety of applications. The M-Series offers three styles in a variety of lengths and finishes, including black, bronze and stainless steel. Available in 36” and 48”.

Our revolutionary In-Fiber Lighting System allows you to add a 36 or 39-1/2 watt light source to fixtures within 3 feet of power source. The newest version of our In-Fiber Lighting System is the LPI4 with a single color temperature (3000k, 4000k, 5000k) and 3500k color temperature. This is the first LED In-Fiber Lighting System that provides variable color temperature and is available with Pole or In-Fiber installs. LPI4 can be either 39-1/2 watt or 34 watt to accommodate the demand of the lighting market.

The 7304-RG is the newest design in transformers. Available in 110V or 240V, the 7304-RG provides the most efficient power factor correction and highest power factor of any transformer in its category. Available in 25VA and 50VA, in 36” and 48” versions. Available in black or bronze finish.

The Submarine is ideal for commercial properties for use in outdoor lighting applications that are not easily accessible. Features include: multi-unit design, connect waterway, multi-color, cable feed, transformer, 12 V NOM and waterproof primary and secondary components.
1989 - Unique Lighting invents the FIRST Multi-Tap transformer for low-voltage lighting
1995 - Unique Lighting invents the FIRST Multi-Matic Direct Burial transformer
1997 - Unique Lighting offers landscape lighting training courses to contractors
1999 - Unique Lighting invents the Wiring Wizard software to calculate voltage drop
1999 - Unique Lighting introduces the FIRST secondary loop Multi-Matic transformers
2000 - Unique Lighting becomes the FIRST manufacturer to offer 25 wire leads on fixtures
2000 - Unique Lighting invents the Equalizer Hub
2001 - Unique Lighting launches the Odyssey line of brass fixtures with a Lifetime Warranty
2001 - Unique Lighting includes lenses and glare control devices with lighting fixtures
2002 - Unique Lighting invents the Orbital Mount and Stratosphere Mounting Bracket
2003 - Unique Lighting offers advanced Unique Universities to contractors
2004 - Unique Lighting launches the Copper Knights line of copper fixtures
2004 - Unique Lighting invents the Satellite Hub
2005 - Unique Lighting launches the Signature Series line of fixtures
2005 - Unique Lighting invents the I-Force Inverted transformer
2005 - Unique Lighting invents the Sequencer on/off device for transformers
2006 - Unique Lighting invents the Augusta in-ground putting green light
2007 - Unique Lighting enhances stop lights by adding adjustment plates for installation
2008 - Unique Lighting launches the Intelli-System 24 Volt wiring system
2009 - Unique Lighting invents the H-Force horizontal transformer
2009 - Unique Lighting offers Green Light products
2009 - Unique Lighting offers USB control panels
How The Power Management System Works (12 or 24 volt)

The Multi-Matic Power Transformer

- With independent voltage taps ranging from 12 to 24 volts, the Multi-Matic compensates for voltage drop from the transformer to the hub and delivers proper voltage to each hub with the ability to have multiple hubs.

The Satellite Hub and Galaxy Hub

- Distributes the proper voltage evenly to every fixture and protects wire connections below ground. The secondary in-line fuse at the hub allows fuse protection with varying fuse sizes according to amp load and wire size.

The Fixtures

- The fixtures complete the system...all Unique fixtures include 24" lead wires, factory sealed and connected (additional lengths available upon request). The wire leads eliminate the need for sealed wire nuts. All connections are sealed and protected at the Satellite or Galaxy Hub.

Benefits of a 24 Volt Hub System

- Save up to 40% on wire expenses.
- Labor savings from less wire pulls & lighter gauge wire.
- Wire cost savings from less wire pulls & lighter gauge wire.
--transformer efficiency improves energy savings by 20%.
- Secondary Amperage load reduced by 50%.
- Voltage Drop reduced by 50%.
- Color rendition / lumens output is more consistent with lower voltage loss between lamp pairs.
- Halogen Regeneration Cycle is expanded.

- 12 Volts: 10 to 12 VDC; 12 W Range
- 24 Volts: 10 to 24 VDC; 12 W Range
- PATENT #: 6,699,487

The System

Exclusive to Unique Lighting, The Power Management System was designed from years of experience and expertise in the landscape lighting industry. Unique’s Power Management System was designed to overcome some of the most common hurdles experienced in landscape lighting which include voltage drop, fuse corrosion, inability to easily move fixtures, leaving the homeowner unable to continue to have a dynamic lighting portrait as the landscape grows and changes.

Unique 12 Volt Equalizer Hub System

Unique 24 Volt Hub System

With conservation efforts at the forefront of global consumption concerns, Unique Lighting Systems, Inc. has made a commitment not only to conserve energy and raw materials, but also to bring value to the consumer. Don’t just buy a system that works. With Unique’s Green Lamps, Intelli-Matic transformers, Intelli-Flex wire and Hub Wiring System, you will now experience twice the benefits and twice the savings than that of a unique 12 Volt system. Unique Lighting Systems 24 Volt systems complement the unique low voltage system with the ease and safety of a low voltage system. The Hub Method of wiring combines design flexibility with efficiency you will also experience reduced material costs, labor reductions and energy savings. We are the first innovators taking manufacturing to a new level and promoting these intelligent, resource minded products.
Features & Benefits

In addition to having the highest quality parts, you need to have an integrated system to create a cohesive lighting portrait. There are three main problems that can ruin a great lighting portrait: poor light output, wiring, and corrosion at the point of connection. To eliminate these problems, Unique has developed the Equilizer Hub Wiring System. Using the Multi-Multi Power Transformer, the Equilizer Hub Wiring System and our top of the line fixtures, Unique has created the only system that produces even lighting output at every fixture and allows for relocation of fixtures at any time. The Hub System requires proper choice of connectors, and can be used with one or more fixtures. Unique Lighting's Odyssey and Signature Series fixtures come with a 25 to 26 foot wire lead that tapers into the Hub, creating a simple and maintenance-free lighting system.

Unique Lighting Systems' Odyssey line of fixtures is the final step in creating the perfect outdoor atmosphere. The pride of Unique Lighting Systems, the Odyssey line is the result of years of research, development and determination to create the most elite lighting fixtures available. Experience the marriage of beauty and durability as each Odyssey fixture is built from solid brass and designed to last a lifetime. Coupled with Unique's Power Management System, the Odyssey line is one of the most dependable and beautiful lighting systems on the market.

All Odyssey Fixtures Come Standard With

- 25 to 50 foot Intelliflex wire leads on all fixtures with Anti-Moisture Migration Connections
- Mounting hardware or stakes
- Full assortment of tempered designer lenses
- Glare control device
- Pre-greased sockets
- Lamps
- LIFETIME WARRANTY
Brass Up Light
Pulsar

Model Shown: PULSAR-821-35-WB

Product Description

One of the most resourceful fixtures in the Odyssey line, the Pulsar offers style and function without compromise. Its sleek, straight lines, black and gold finished fixture and the fixtures integrated in-line make the Pulsar an essential fixture when lighting palaces, trees, columns and other tall elements in the landscape.

The Pulsar can also be utilized for back lighting, grace lighting, shadow lighting or simply as a directional up light.

Specifications

Voltage: 12 & 24 Volt
Construction: Cast brass
Finish: Electroplated brass
Knob: Cast brass, Adjustable
Socket: B10 or B13, Pre-Grounded Screw and Lead, 360° Rotation
Mounting: Ball and Socket Mount, Brown PVC Gravity Stabilized
Wiring: 24 in.
Wire: 22 Gauge, Black and White Wire, Anti-Moisture Migration Connections
Deflector: 30 mm (1.2 in.) Black and White
Other Lenses: Available Upon Request
Lifetime Warranty: 30 Years

Mounting Options / Accessories: ZERO, ZEROW, Siphon Base, Stabilizer Stave, Strut Bracket, Umbrella and Risers - 61723-24-16

Brass Up Light
Probe-OBM

Model Shown: PROBE-OBM-821-20-WB

Product Description

The Probe is enhanced by a revolutionary ball and joint probe mount allowing a 360° rotation plus giving 100% accuracy when dialing in the proper lighting angle. The Probe is ideal when up-lighting is challenging by a small installation area. Featuring a black and gold, the Probe is enhanced by a revolutionary ball and joint swivel mount allowing a 350° rotation plus giving 100% accuracy when dialing in the proper lighting angle. The precision die cast brass body features a 111W, 300 Watt Halogen bulb.

Specifications

Voltage: 12 & 24 Volt
Construction: Cast brass
Finish: Electroplated Brass
Socket: B10 or B13, Pre-Grounded Screw and Lead, 360° Rotation
Mounting: Ball and Socket Mount, Brown PVC Gravity Stabilized
Wiring: 24 in.
Wire: 22 Gauge, Black and White Wire, Anti-Moisture Migration Connections
Deflector: 20 mm (0.8 in.) Black and White
Other Lenses: Available Upon Request
Lifetime Warranty: 30 Years

Mounting Options / Accessories: ZERO, ZEROW, Siphon Base, Stabilizer Stave, Strut Bracket, Umbrella and Risers - 61723-24-16
Brass Up Light
Polaris

Product Description
The Polaris is ideal when up lighting is challenged by a small installation area. Featuring a Lock and Load slot, the Polaris is enhanced by a revolutionary ball and joint lock mechanism allowing 100% accuracy when dialing in the proper lighting angle. The pedestal claw base bodies house a 20 Watt MR-11 Halogen bulb or a 20 Watt Astro-Brite.

The Polaris is the perfect fixture for gazebo lighting, cross lighting or accent lighting.

Specifications
Voltage: 12 & 24 Volt
Construction: Cast Brass
Finish: Weathered Brass
Features: Lock and Load Slot
Shroud: 3/8” Thick, 90° Rotation
Mounting: Tapped 3/4”
Weight: 3 lbs.

Product Description
Capable of the most versatile installation applications, the Starburst functions as both a directional up light for a wall washer fixture. This 8 in 1 fixture features an unprecedented dual socket mount system allowing you to install a vertical MR-16 for directional up lighting or a horizontal Astro-Brite lamp for wall washing when necessary. Both lamps are included with every Starburst for maximum design adaptability.

Specifications
Voltage: 12 & 24 Volt
Construction: Cast Brass
Finish: Weathered Brass
Knuckle: Cast Brass, Adjustable
Sealant: butyl rubber (pre-greased)
Mounting: Tapped 3/4”
Weight: 1.1 lbs.

Dimensions: 8” x 8” x 5.5”
Full Lens: Kit and Free License
Lifetime Warranty: 100,000 Hours

Mounting Options: Accessory: ZEB2G / ZEROW2G / SPHERE BASE / STABILIZER STAKE, STRAT BRACKET / UNBRACKET and RISERS - 611 224 236
Brass Up Light
Stellar

**Product Description**
The Stellar is one of the most versatile fixtures in the Odyssey line. The Stellar mini wall washer is a powerful fixture. Featuring a small die cast brass body, this understated power house is usable to illuminate planter areas, short retaining walls, step landings or any other area needing a soft glow. Advanced applications include under eaves or second story level lighting*.

*Sphere Base needed when installing the Stellar on a surface mount application.

**Specifications**
- **Voltage**: 12 & 24 Volt
- **Construction**: Cast Brass
- **Finials**: Weatherproof Brass
- **Sockets**: Euro Bayonette (B&B)
- **Knuckle**: Cast Brass, Adjustable
- **Mounting**: Flood, Static
- **Wiring**: 25 foot, 18/2 Black/Sbee Antimicrobial Wire, Anti-Moisture Migration Connections
- **Deflect Lamp**: 20 Watt, White, 2500K, Auto Green
- **Other Lamps Available Upon Request**
- **Maximum Wattage**: 20 Watts
- **Full Lens Kit**
- **Lifetime Warranty**

Model Shown: STELLAR-B25-20-WT

Brass Up Light
Big Bang

**Product Description**
A powerful and heavy duty directional up light, the Big Bang is perfect when illuminating trees, tall structures and vast spaces. The stainless steel lamp retainer secures lamp in place, while the dual utility and hot knife shaped mascot installation fast and easy. The Big Bang can be ordered with a 240V, 120 or 120V lamp.

The Big Bang can be used in numerous applications including back, shadow or grave lighting. It is also the perfect directional light to use when uplighting columns.

**Specifications**
- **Voltage**: 12 & 24 Volt
- **Construction**: Cast Brass
- **Finials**: Weatherproof Brass
- **Shade**: 8.5" Adjustable, Locking MCM Shade
- **Additional Options**: Cast Brass, Adjustable
- **Mounting**: Bracket, PVC, Gravel Stake
- **Wiring**: 12V, 25 foot, 18/2 Black/Sbee Antimicrobial Wire, Auto Green
- **Deflect Lamp**: 25 Watt, White, 2500K, Auto Green
- **Other Lamps Available Upon Request**
- **Full Lens Kit and Hot Knife**
- **Maximum Wattage**: 20 Watts
- **Lifetime Warranty**

Model Shown: BIGBANG-B25-35-WT
Brass Well Light
Apollo

**Product Description**
Sleek, streamlined and versatile, the Apollo design and function. A powerful in-ground well light, the Apollo uses a 5W 35 watt wide flood lamp to cast a bright beam of light against any landscape element. Its dual cut body allows for surface flush or in-ground installation options. The patented stainless steel gimbal ring holds the lamp in place while allowing vertical and horizontal adjustments within the composite body. The Apollo also features a 27 brass collateral guard to allow for above-ground installation.

**Specifications**
- Voltage: 12 & 24 Volt
- Construction: Brass & ABS Composite
- Finish: Weathered Brass
- Mounting: Tempra Thermo Composite
- Details: brass guard, Tempra Plastic Guard
- Mounting: In Ground
- Weight: 3.5 lbs.
- Wire: 25 feet, 24/2 Flex Wire
- Optional Lamps: 100 watt max. 120 volt halogen
- Other Lamps: Available upon request
- Maximum Wattage: 50 Watts
- Full Lens: Kit and Frosted Lens
- Lifetime Warranty
- Patent: 6,604,027

**Designer Lenses**
- Included

Brass Well Light
Nova

**Product Description**
Designed to provide in-ground lighting solutions, the Nova is ideal for up-lighting a variety of elements, from trees and statues to pillars and other vertical structures. The die cast brass shell is a standard accessory designed to immerse gives while the designer lens allow maximum design control by creating various beam spreads and light output. Use the Nova as a back, side or accent light for the perfect graceful or shadow effect. Revers the Nova in hardscaping areas by utilizing the included PET screen.

**Specifications**
- Voltage: 12 & 24 Volt
- Construction: Cast Brass
- Finish: Weathered Brass
- Socket: E26 Standard Socket (pre-greased)
- Mounting: In Ground, PET Concrete Sleeve Included
- Weight: 3 lbs.
- Wire: 25 feet, 24/2 Flex Wire
- Standard: 12 volt lamps included with coordinated screws
- Default Lamps: 30 watt max. 120 volt
- Other Lamps: Available upon request
- Maximum Wattage: 30 Watts
- Full Lens: Kit and Frosted Lens
- Lifetime Warranty

**Designer Lenses**
- Included
Brass Well Light
Nova Star

Product Description
Designed to provide inground lighting solutions, the Nova Star model features a variety of elements, from trees and shrubs to pillars and other vertical structures. The die cast brass brings in a standard accessory designed to maximize light while the designer lenses allow maximum design control by creating various beam spreads and light outputs.

Use the Nova Star as a back, side, or accent light for the perfect grazing or shadow effect. P recess the Nova Star in hard landscaping where it allows ground light can’t be used by utilizing the supplied PBT sleeving.

Specifications
- Voltage: 12 & 24 Volt
- Construction: Cast Brass
- Flexible Weatherproof
- Socket: E12/R14 lamp pre-greased
- Mounting: Grit Sand Fill Concrete Sleeve Included
- Weight: 2 lbs
- Wire: 25 Foot Intertek Flex Wire
- Shroud: Cast Brass Gear Included with Capped Screws
- Default Lamp: 20 Watt MR-16 80W
- Other Lamps Available Upon Request
- Maximum Wattage: 20 Watts
- Lead 40° and Hex Louver
- Lifetime Warranty

Brass Down Light
Comet & Comet-HG

Product Description
Perfect for those hard to install under eave areas, the Comet model packs a revolutionary ball and joint swivel mount allowing 360° rotation. The Orbital Mount swivel is removable for a flush or recessed mounting option.
The Comet is also available with a 3-brass chain to be used as a hanging fixture (COMET-HG).

Specifications
- Voltage: 7.2-24 Volt
- Construction: Cast Brass
- Socket: Bayonet Copper pre-greased
- Shroud: Cast Brass 167° 70W T580
- Knuckle: Ball and Joint, MP® Global Mount
- Mounting: Cast Brass Sphere Base
- Ball Mounting Chain (COMET-HG)
- Weight: 2 lbs (COMET - 2.5 lbs (COMET-HG))
- Wire: 25 Foot Intertek Flex Wire, Accessible Mounting Connection
- Default Lamp: 30 Watt MR-16 80W
- Other Lamps Available Upon Request
- Full Lens Kit and Hex Louver
- Maximum Wattage: 12 Watts
- Dark Sky Compliant
- Lifetime Warranty

Mounting Options / Accessories: NOVASTAR-THING, COMET-THING, COMET-HG-THING
Brass Down Light
Lunar

Product Description
Perfect for when installation conditions are recessed back or greater glare control is needed, the Lunar features a lock and load extended shell. The versatile foot and key ball and joint swivel mount allows a 360° rotation. The Lunar comes with the patented Astromphere Bracket.

Specifications
- Voltage: 12 & 24 Volt
- Connection: Cast Brass
- Finish: Weathered Brass
- Socket: E26 Lamp, Copper pre-greased
- Knockout: Cast Brass, SBS, Octal Mount
- Mounting: Astromphere Bracket
- Weight: 785 lbs
- Wire: 25 feet, 600m, 240 Volt, 10 Gauge, CL2

Designer Lenses
- Full Lens Kit and Hex Louver
- Dark Sky Compliant
- Lifetime Warranty
- Patent Pending

Brass Down Light
Quasar 1

Product Description
Perfect for when installation conditions are recessed back or greater glare control is needed, the Quasar 1 features a lock and load extended shell. The versatile foot and key ball and joint swivel mount allows a 360° rotation. The Quasar 1 has a slightly smaller shroud than the Lunar, giving it a wider beam spread. The Quasar 1 comes with the cast brass sphere base.

Specifications
- Voltage: 12 & 24 Volt
- Construction: Cast Brass
- Finish: Weathered Brass
- Socket: E26 Lamp, Copper pre-greased
- Knockout: Cast Brass, 600 Volt, Octal Mount
- Mounting: Cast Brass Sphere Base
- Weight: 830 lbs
- Wire: 60 feet, 600m, 240 Volt, 10 Gauge, CL2
- Other Lamps Available Upon Request
- Maximum Wattage: 10 Watts

Designer Lenses
- Pull Lens Kit and Hex Louver
- Dark Sky Compliant
- Lifetime Warranty
- Patent Pending
Blow Down Light  
Quasar 2

Product Description
A square version of the Quasar 1, the Quasar 2 offers down lighting solutions when lighting overhead structures, walls or any similar shaped item. The mounting back plate secures the fixture while still allowing for front and back adjustments. The included siliconized designer lenses are perfect for the desired light pattern output.

Use the Quasar 2 for down lighting entryways, columns, pathways or simply at an area light.

Specifications
- Voltage: 12 & 24 Volt
- Construction: Brass
- Finish: Textured Brass
- Sockets: Berry & Stupfer Copper pre-greased
- Bulbs: LED 5W+6W Candelabra
- Mounting: Surface Mount
- Weight: 6 lbs
- Wiring: 20 Gauge Lead Wire, Anti-Maturation Connections

Brass Well Light

**Apollo Star**

**Product Description**

Tough and resilient describes the Apollo Star’s design and function. A strong and powerful eyebrow well light, the Apollo Star uses a 50-watt BR30 Halogen wide flood lamp to cast an ample beam spread against any landscape element. Its corrosion-resistant brass guard gives a rugged quality without compromising aesthetic design while the lens holder slips over the lamp that holds a Cast Brass Guard lens to create a canopy of beam spreads with the ease of a built-in lens. The tempered, patterned, stainless steel grille ring holds the lamp in place while allowing vertical and horizontal adjustments within the composite body.

**Specifications**

Custom Colors
Supply us with your custom PMS color and we will match it.

Please note that all Unique Lighting fixtures have a “Living Finish,” and can be expected to vary in hue over time. Our fixtures come standard with one-of-a-kind Weathered Brass finish or a Natural Brass.

Additional colors may be achieved through a powder coating process. These colors are subject to varying lead times and will incur an added cost. A Limited Warranty applies to all powder coated products.

Custom colors are also available upon request. All custom color orders must come supplied with specific color documentation and are subject to varying lead times and costs.
A powerful in-ground well light, the F225 uses a PAR 36 35 watt wide flood lamp to cast an ample beam spread along any landscape element. Its dual cut body allows for surface flush or angled installation options. The patent pending stainless steel gimble ring holds the lamp in place while allowing vertical and horizontal adjustments within the ABS body.

All Unique Lighting Well Lights are now available in brown (LB).
Unique Transformers

H-Force Horizontal Transformer

The H-Force is the newest design in transformers. Available in three different wattage options: 120, 150, and 1800, the H-Force is the most powerful transformer in the high voltage lighting industry.

- A separate work compartment
- Oversized colored terminal tags ideal for multiple connections at each tap
- Snap-in photocell ready
- Available in Weathered Brass (WB)

All available in 12 and 24 volt.

Unique Lamps

Longest Lamp Life Available

Two key items to consider before making your landscape lighting decisions are lamp life and color of light emitted from the bulb. Being the innovator in the field, Unique uses lamps that produce the best illumination while lasting the longest period of time. All of Unique’s Odyssey fixtures come with a high quality Halogen or Astro-Brite lamp that will last between 4,000 to 20,000 hours, giving you years of trouble-free operation. Most importantly, the lamps produce beautiful white light that preserves the natural color and aesthetics of your landscape and property.

Exclusive To Unique - Green Light & Astro-Brite Lamps

Unique’s Green Light and Astro-Brite lamps give adequate light levels with minimum energy usage, ensuring Level 1 light output onto hard surfaces. With it’s up to 20,000 hour ratings, the Green Light and Astro-Brite will outlast any other lamp. In addition, unlike halogen, the Green Light and Astro-Brite are unaffected by the oils on your fingers. All 2-pin sockets are beryllium copper to last a lifetime, along with being factory greased to prevent corrosion and pitting. They also incorporate a extra heavy-duty ceramic socket rated for 25 amps. All components are replaceable.
